

Apply Complete Episodic Cost Data to Your Quality and Outcome Metrics

Through Comparative Data and Our Proprietary Algorithms Identify Cost Drivers and Quantify Savings Opportunities

How The Normalization Process Works:

This process utilizes an 18-month feed of payer claim data.

How You Can Leverage:

- Identify providers driving episodic cost variances
- Redirect providers and members to more cost effective locations
- Optimize narrow network performance
- Create bundled payment contracts
- Improve value based contract performance

The Result:

Episodic pricing information can be leveraged within existing workflows to guide providers to the most cost effective and local locations.

Contact us today to see how RemitDATA's episodic pricing information can expand the view of your grouper's quality and outcome mix.
