

Denial Trends Today

Q1 2017 Review

The HME/DME market has experienced significant changes over the past few years, which is in line with the healthcare industry as a whole. In the HME/DME space, we are seeing varying denial rates within different denial categories. Here are a few Q1 highlights.

21%

Of HME/DME claims denied can be attributed to Eligibility reasons – down 3% compared to 2016.

Medicare is the payer leading to the greatest percentage of these Eligibility denials.

Q1 2017 Most Common Eligibility Denial Reason Codes:

- 204:** Service/equipment/drug is not covered
- 27:** Expenses incurred after coverage terminated

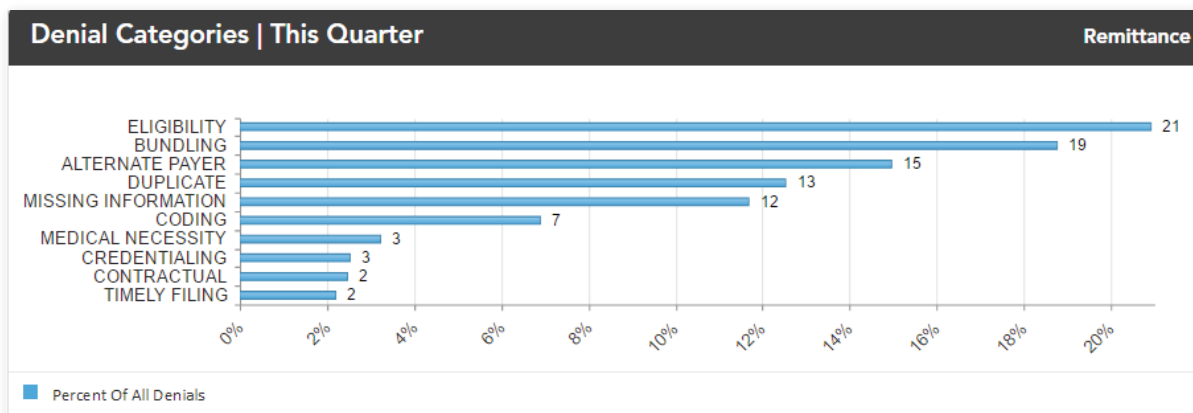

↑ Most Commonly Denied Services Up 2% from 2016 | Oxygen and Supplies

Leveraging comparative analytics, practices can compare data to peers and identify areas needing improvement.
